Harris County's Duplicating Ballot Process

Harris County Duplicate Paper Ballot Software Process

Step 1: Printing duplicate ballots

Scan the top left barcode of all original ballots into the database. This will generate a file to export/import into Ballot Now. Save to a thumb drive and introduce the thumb drive to Ballot Now for printing. All duplicate ballots will print in the same order as scanned.

Step 2: Duplicating serial number labels for ballots and Duplicate Report

Scan top left & bottom right barcodes of the original & duplicate ballots. Two labels will print out (see reverse for sample). Place the original label on the original ballot and duplicate label on the duplicate ballot. The ballot precinct and serial numbers are captured on a report which can be printed (see reverse for sample).

Step 3: Duplicating paper ballots

- Two clerks are needed to duplicate ballots
- Barcodes are scanned, labels printed and placed on ballots prior to this process
- Both clerks will verify serial number and precinct number on labeled ballots to the printed report
- One clerk will say the voter's choice of candidate's name and the other clerk will mark the ballot accordingly
- Ballots are verified by another team to ensure accuracy of duplication
- Ballots are kept in two stacks and the duplicated stack is read into Verity Central

Items needed: Harris County software, label printer, scanner, pc & printer, and pen.
